FESTIVALS - SECURITY TEAMS - MAJOR INCIDENT PLANS

We understand that it's not always practical to carry your patrol vest when travelling to work or between jobs. The Niton design team have used the same basic design of our hugely popular Niton 4 Pocket Vest, but made it transform from a convenient carry bag to a fully functioning patrol vest. It's compact for easy storage, deployment and transportation. Ideal for security company's who have large teams of temporary staff, storage is far easier, and deployment is as simple as handing them the bag! Transformation to a fully functioning patrol vest takes under a minute!

Major Incident teams can use the "Transformer" Vest too - store your basic major incident kit ready packed in one of the four large bellowed pockets, making it easily accessible and fast to deploy. The vast amount of room needed to store existing kit can be greatly reduced as the "Transformer" Vest can be filled, boxed and stored ready for fast and effective deployment.

Why use a patrol vest... Officers have to carry lots of kit and carrying this weight around their waist is not always comfortable or practical - the "Transformer" vest will take the weight and evenly distributed over the body and shoulders, reducing the strain often associated with wearing a belt.

STEP 1

From a closed position, unzip all the way around and unfold to open vest.

STEP 2

Once opened, insert the carry handles into hidden velcro areas behind the two top bellow pockets, adjust the fit of the vest with the side velcro flaps at the back of the vest.
