

NITON TACTICAL™ PROFESSIONAL BUMP-CAP

Every year in the UK thousands of people suffer head injuries in the workplace. We're on a mission to reduce this figure. Niton tactical bumpcaps provide protection against minor bumps and scrapes, and our fashionable, bespoke designs mean Bumpcap is a form of safety wear that staff will actually want to use.

Metal Mesh eyes improve airflow and cooling

Unique ABS protective shell complies to the EN812 standard

Velcro Straps - Easily adjustable for secure fitting & comfort

Foam Pads - High density EVA Shock absorbing pads for optimum impact protection and comfort

Short Peak with stylish tonal trim, reduced length for enhanced upwards visibility

• EN 812 : 1997 EEC Personal protection Equipment directive 89/686/EEC

Removable polyester / cotton cover. Heavy Duty Cotton Twill with Embroidered Logo & Chequered banding.

Note: The bump caps do not provide protection against the effects of falling or thrown objects, or suspended loads. They should not be used instead of an industrial safety helmet as specified in EN 397.

Colour: Black Police Logo or Navy Security Logo.

HATCH™ SIZE CHART

Use one of these methods to find your approximate glove size.

Remember, no two hands are alike. Finger length relative to palm size is not constant from person to person.

Additionally, what constitutes a comfortable fit can vary considerably between individuals.

Using one of the methods below will help you to find an approximate glove size, but no method of measurement can substitute for actually trying them on.

METHOD 1:

TAPE MEASURE.

Wrap a tape measure around your hand at the widest point (usually the knuckles) and make a loose fist.

Note that measurement, round it to the nearest inch and refer to the chart above to find your approximate glove size.

METHOD 2: SIZING GAUGE.

Place your right hand with your index finger against the line

MEASUREMENT			U.S. SIZE	EU SIZE

NITON999 takes great pride in offering Oakley to the Law Enforcement community.

In 1975, a technology company looked at a product and saw an opportunity. The

result was an innovation, a motocross handgrip with a unique orbicular design. The company was Oakley. It began a legacy of seeking out problems and solving them in ways that redefine product categories. This discipline requires an unyielding drive to defy convention and invent a better solution. It is based on three fundamentals: Find opportunity. Solve with technology. Wrap in art.

Oakley have been supplying to the military for over 20 years. Over time, Oakley's military line has transformed from a few models to a highly specialized division within Oakley.

Today that same passion generates product prototypes in SLA liquid laser tanks. It sculpts in the virtual world of CAD/CAM engineering and renders innovations with 3-D digital mastering. New generations of products are constantly developed at Oakley's California research and production facility.

Oakley's partnership with the U.S. Armed Forces began in the 1980's. The alliance was formed to develop new technologies that improve the safety, performance and comfort of our soldiers. This initiative in research and development continues to produce combat ready equipment for those whose lives depend on their gear. From the billions spent each year on defence, these are just a few of the dividends.

The SI Line (Standard Issue), is designed exclusively for Law Enforcement customers and is not available in retail stores.
