MISSION II BOOTS

**FROM THE BEAT, TO THE RAIN, TO THE HEAT
NITON HAS YOUR FEET COVERED
FOR ALL EVENTUALITIES**

If there's one thing we know about it's boots - selling thousands of pairs every year from all of the leading manufacturers, we know what you like and what you need.

We have listened to YOUR feedback, taken from across all the ranges and rolled it into one - our Niton Tactical MISSION II™, possibly our best boot ever!

It's featherweight construction combined with the durability you expect from Niton - a boot built to outlast the demanding needs of today's Law Enforcement Professionals.

- Fits like a trainer with no break-in required
- Looks & performs like a boot twice its price!
- Water-resistant breathable upper
- Moisture wicking lining
- Non-metallic
- Removable comfort foot bed
- Energy absorbing heel pad
- Slip and oil resistant non-marking outsole
- Suede Collar
- EN 347

These boots are incredibly lightweight and make the most of top quality material but at an affordable price. Fast entry side zipper. Up to the minute styling, coupled with the durability you expect from us! Colour: Black. Sizes 3-14

Code TAC52

**TESTED-PROVEN
TRUSTED**

Men and women in uniform take the call of public service to the extreme, setting aside their own comfort and safety to protect the rights, property and lives of others. In return, they deserve only the highest performance, most comfortable and best value footwear, made by a company that takes its duty as solemnly as soldiers and police officers take theirs.

FEATURES & BENEFITS

With its debut, Bates Ultra-Lites redefined quality for the value priced duty footwear market. Ultra-Lites provides you with unsurpassed quality, comfort, and style.

- 1680 DENIER BALLISTIC NYLON: For durability and improved appearance
- VELCRO ZIPPER STRAP: Secures and silences zipper fob
- PADDED COLLAR: Long-term comfort
- NON METALLIC SPEED LACE/EYELET: Easy lacing system, security friendly
- FLEX POINT AT HEEL: Padded comfort & flexibility
- FLEX NOTCH: No break-in forward flex

ENFORCER SERIES ULTRA-LITES OUTSOLE

Aggressive profile styling for lateral stability. Forefoot cross channels for easy flexibility and oval lugs for grip in all directions.

A breakthrough in advanced comfort technology, Bates Individual Comfort System gives you the freedom to choose the setting that's right for you. The products with this technology have a midsole containing a removable disc that can be rotated among four zones to control firmness, cushion, inward and outward stability.

Just rotate the dial among four zones;

Outward Zone

Set the dial to the "O" position to reduce outward tilt and maximize natural walking motion and stability.

Cushion Zone

Set the dial to the "C" position to increase shock absorption.

Inward Zone

Set the dial to the "I" position to reduce inward tilt and maximize natural walking motion and stability.

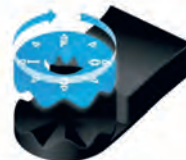

Firm Zone

Set the dial to the "F" position to increase energy return.

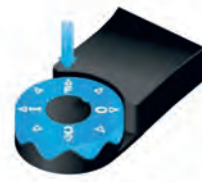

To dial your individual comfort level it's simple...

1 LIFT INSOLE AND REMOVE DISC.

2 ROTATE DISC TO COMFORT SETTING.

3 SET DISC AND REPLACE INSOLE.

BATES® DELTA-9 ICS SIDE ZIP

These leather and nylon boots allow you to select the level of comfort and performance you want. The midsole features an adjustable disc that can be placed among four settings to control firmness, cushion, inward and outward stability. The side zipper allows for ease in putting on and taking off and non metallic components make passing through electronic security effortless. A slip resistant rubber outsole and cement construction ensure comfort and traction for long days on the job. Size 6-12

2 YEAR GUARANTEE: This warranty covers substantial defects in materials and workmanship in your new HAIX product for a period of 2 years. T&C's Apply. See website for more details.

SUN REFLECT: Reduces the heating effect of the upper leather by direct sunlight. Sunlight is reflected by the leather, keeping the leather and the feet cooler

CROSSTECH®: Fabrics provide liquid penetration resistance against blood and body fluids in combination with waterproofness and breathability. Increased chemical protection.

HAIX® MSL SYSTEM: MicroSoftLight: Improved damping, extremely low weight due to the PU foam across the entire sole area, good cold/heat insulation

GORE-TEX: Optimal climate comfort for all seasons, waterproof and breathable. Highly abrasion-resistant lining with fleece midlayer.

NTOA TESTED & RECOMMENDED: Products tested in the field by the law enforcement community. Designed as a service to assist you in selecting the best products available to the tactical community.

HAIX® are worn the world over by professionals who - in their specific field - belong to the elite: Special Forces, fire brigades, rescue services. These are people who must be able to rely 100 percent on their equipment when performing their hard and often dangerous tasks.

It is their performance which motivates us - in particular with regard to service. We know just how hard they have to perform. Speed is of the essence when it comes to performing their tasks. We certainly do not want to lag behind. Local specialists ensure that your HAIX® are ready for use as quickly as possible. Accessories can be purchased in our shop and our service hotline provides dealers and customers with advice and assistance.

From old to new again!:

- Replacement of shoelaces
- (laced fire boots are exclusively fitted with NOMEX® shoelaces)
- Resoling and replacement of rubber toe caps
- Replacement of inside backstraps, hooks and loops
- Repairs to seams.

ion-mask™
Technology by P2i

Originally developed for military clothing and designed to combat chemical agents, ion-mask technology is an award winning ultra protective surface enhancement. Invisible to wearers, the protective layer of ion-mask™ is over one thousand times thinner than a human hair. The technology is bonded to the surface, making it extremely durable without affecting the look or feel. Furthermore, ion-mask™ lasts as long as the material itself and is not compromised by everyday wear.

Treated footwear keep wearers comfortable and dry by repelling water from outside and maintaining optimum control of temperature and breathability. By resisting the absorption of water and dirt, ion-mask™ also helps guard against stains, making products look newer for longer.

MAGNUM® BOOT LACES

FOOTSCIENCE

"There's man all over for you, blaming on his boots the fault of his feet" (Samuel Beckett)

If you have faulty feet but have to spend all day patrolling, orthotic insoles could be just the thing to transform your boots into the comfortable and supportive footwear you need.

Foot Science Insoles fit precisely, without trimming, in virtually all boots, work shoes and trainers to provide a degree of support and comfort. Best of all they are indestructible in normal wear, unaffected by moisture and hygienic (with anti-microbial agents in the

material) and each pair of Insoles comes with a lifetime guarantee.

The Foot Science Orthotic Insole was designed by internationally recognised Podiatrists and Biomechanics experts at the University Of Salfords School Of Podiatry - the largest in Europe. The Insole has been clinically designed and biomechanically

proven to support the arch of the foot and control excessive foot movement (particularly over-pronation), making the foot and lower limb more stable and helping to prevent many types of foot and lower limb injury. The Insoles are now widely used by Podiatrists and Physiotherapists across the world and are now available direct to the Law Enforcement professionals though Niton999.

Podiatrists and Physiotherapists recognise that individuals with pronated (flat) feet are particularly prone to pain under the heel (Plantar Fasciitis - policeman's heel) in the arch of the foot at the front of the shin and knee (runners knee) and Achilles tendon problems. In addition feet can ache and feel tired after prolonged periods of activity.

- Machine washable - low odour properties
- Silver based anti-microbial agents embedded into the material help keep your feet healthy
- Environmentally friendly - 100% of the material can be recycled

Dr. Martens have more than 50 years of hands-on expertise evolving and improving every aspect of the work boot, combining comfort, safety and reliability. Using modern materials and cutting edge manufacturing processes, Dr. Martens Industrial footwear can be totally relied on for hard use.

SDM SOLE: This traditional PVC work boot cleated sole is heat-sealed and benefits

from a wooden shank for improved mid-foot rigidity. It's slip-resistant with a high degree of oil and abrasion resistance and has first-class energy absorbing qualities in the heel strike area.

WELTED: This is a Goodyear-welted product. The upper and sole are sewn together,

not merely glued, like many footwear constructions. This, together with our Z welt-stitch and heat-sealing process, makes it unique to Dr. Martens.
