

NITON TACTICAL™ RESPONDER ID

- Instant and simple identification on any vehicle
- Extremely visible day and night with retro-reflective letters
- Multiple applications - use at accidents, scenes of crime, when parking etc.

The Niton Tactical™ Responder-ID is highly visible in all light conditions. Made to a specialist design that we guarantee will fit all vehicle sun visors with no clips, brackets or sticking - it simply slides over your sun visor. Extremely versatile, it is made from the highest quality black moulded compound. We guarantee that they will not be affected by extreme heat or cold. We only use 3M reflective which has the best inks that won't fade, even in the brightest light.

Made from recyclable, washable, UV stable, shatterproof and fire retardant plastic. Measures 295mm x 110mm.

Code TAC46

The amount of 'Essential Kit' required in your vehicle is immense - It must be compact, fast to deploy and most important organised!

FOLDAWAY CONE

4 PACK POP UP TRAFFIC CONE

- Lightweight yet stable; mesh construction withstands wind, rubber base grips road surface (1.4kg).
- Reflexite reflective collars provide excellent night time visibility
- Supplied in a transportation collar that holds a set of 4 cones.

Each transportation collar holds 4 x 74cm reflective spring cones. Each cone weighs just 1.4kg and the pack stores in a space just 35 x 35 x 40mm.

The Quick Deploy Spring Cone is the only self deploying collapsing cone. The Spring Cone is designed for use on high speed roadways, (speeds exceeding 60mph), heavy wind and high draft conditions and is also ideal for portable emergency landing zones. Quick Deploy Spring Cones take impacts and spring back into action. Half the weight of traditional PVC cones, they are easy to carry and deploy. Spring Cones also store in a 1/3 the space of traditional PVC cones making them ideal for emergency responders, utilities and towing operations. MUTCD compliant for use day and night.

Code QZPOP

FOLD AWAY EMERGENCY CONE

- Ensure your road safety when parked on the hard shoulder or down dark country roads. Be safe, be seen.

- The highly visible cones are seen from up to 600m away.
 - They also include a flashing LED light enabling them to be seen in fog and reduced lighting conditions. They have two settings: either flashing or constant.
 - The LED is powered by two AAA batteries, lasting approximately 300 hours.
- Details: 30 inch Pop-Up Cone with Flashing beacon: Easily deploys in seconds, and can be seen for up to 600m. Individually bagged with carry handle. 30" when fully extended. The Fluorescent cone and reflectors establish a 360° safety zone. The sturdy base withstands high winds of fast-moving traffic. Powerful emergency illuminating flasher increases visibility in poor light conditions or adverse weather. Takes 2 AAA Batteries Inc & replaceable. Each set of batteries will last for over 300 hours. Easily deployable in seconds and conveniently packed away into a carry bag, leaving more room in your car boot for all your other safety equipment.

Code AA368

STOP FIRE

NEW

- The Stop Fire Aerosol Fire Extinguisher is a must for every area around a business, home or motor vehicle.

Simple to use and re-usable it will save you money and the hassle of discharging a conventional fire extinguisher for a small fire. The Stop Fire product requires no expensive maintenance or annual testing. Practical and very effective 400ml aerosol 90 seconds effective spray time. Can be activated and de-activated without emptying completely.

Ideal where welding or metal grinding may cause sparks
A must have at home and in the car
Ideal for everywhere with a naked flame
Causes no harm to furniture or equipment
Can be sprayed directly onto humans and animals

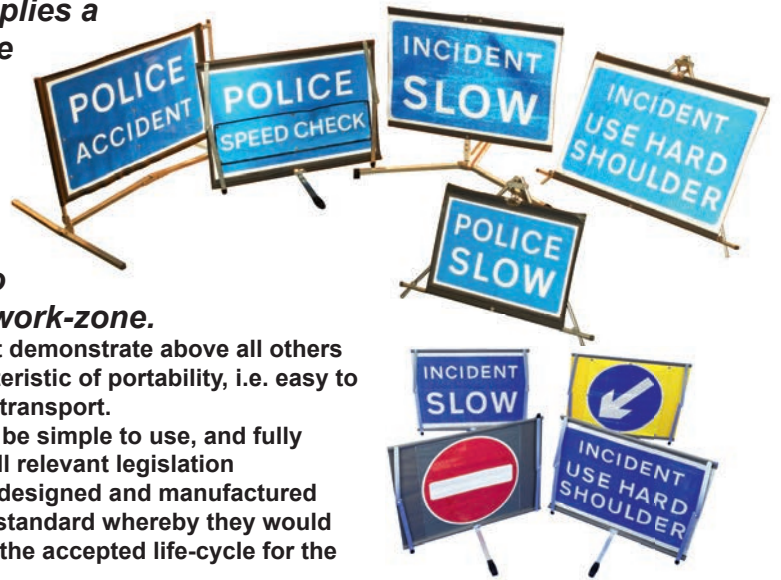

Code SF001

Niton now supplies a comprehensive portfolio of innovative solutions designed specifically for the short to medium term work-zone.

- A product must demonstrate above all others the key characteristic of portability, i.e. easy to both store and transport.
- All products to be simple to use, and fully conform with all relevant legislation
- All items to be designed and manufactured to an exacting standard whereby they would greatly exceed the accepted life-cycle for the product sector.

TRIFLEX™ STAND

Tried and tested space saving products - used by Emergency Services throughout the world.

- Extremely stable - tested up to 60mph
- One piece design - Quick and easy to erect.

The overlays use high grade reflectivity. A wide range of overlays are available to special order, including bespoke designs. Rust - proof metal work. Please call for further details.

Standard signs: POLICE SLOW or POLICE ACCIDENT

Code QZ003

Available in: Orange, Blue, Red, White and Green. State colour when ordering.

Code AA524

NITE BLADE 800

**IF YOU THOUGHT A DRAGON WAS THE ONLY WAY TO
LIGHT UP THE SKY...
THEN YOU HAVEN'T SEEN THE NITE-BLADE 800.**

The NiteBlade has so many features it is perfect for use on patrol or in survival situations. With an ultra-bright 800 lumen output this torch can be seen for half a mile using full power or the SOS signal. It's easy to operate with its large glow in the dark tail cap, and is rugged enough to withstand the rigours of law enforcement.

LED Cree Bulb: 800 lumens LEDs have a life span of 100,000 hours. Combined with a high quality reflector there are no black spots - just a focused white beam. The light produced on full power has a range of half a mile!

Functions: The Nite-Blade has 5 functions - 100% power, 50% power, 25% power, strobe and SOS signal. This way you can use the same torch no matter what you encounter on shift. Full power is great for searching, reduced power can be used to save energy for reading, or the powerful strobe or SOS can be used to attract attention or as an alert.

Construction: We have used high grade aluminium for a hard wearing, robust structure. Anti-roll body, and a knurled patterning over the barrel for an easier grip.

Power: The NiteBlade is supplied with 2 rechargeable 18650 batteries. The in-car charger means you can keep the power topped up on the way to work.

Length: 24.5cm. Barrel diameter: 2.5cm. Bezel diameter: 4cm

Code TAC802

3M REFLECTIVE VEHICLE TAPE

• 50mm Reflective self adhesive tape for increased visibility
• 4 Colours; Red, Silver, Blue & Yellow
Create your own designs to give your company vehicles that professional corporate image. Sold by the metre or 45 metre rolls. Comes in 4 colours, Red, Silver, Blue and Yellow.

Code 3MVT

RESCUE TAPE

• Self fusing & pressure resistant up to 8 bar

• Waterproof - airtight permanent seal

Resists 260c & insulates 8,000 volts. Can be applied under water. Never gets gummy or sticky.

DIRECTIONS: Wrap Rescue Tape around project by stretching and overlapping onto itself. Stretch at least double to ensure a good bond; for high pressure leaks stretch to maximum amount. The tighter the Rescue Tape is wrapped, the quicker and stronger the bond. 25.4MM (W) X 3.65M (L) X 0.5MM(T).

Available in Black, Clear, Red, Orange, Yellow. Green, Blue or white.

Code RT001

Also available in 50mm Rolls - call for details.

STOP ACCIDENTS SLOW VEHICLES

HAND-HELD RADAR GUN

- Switchable for approaching, receding or bi-directional use
- Highly accurate, lightweight and portable
- Low power K-band output for user safety
- Runs from vehicle lighter or optional rechargeable battery pack

For use in traffic surveys, ports, distribution centres, industry, quarries, bus depots, etc. The only CE approved Speed Gun available. Complies with the R&TTE Directive (1999/5/EC).

The Z-45 has been specifically designed for the EU market. It will accurately measure vehicle speeds and form a key element in reducing speeds and therefore accidents.

Transport organisations can reap significant benefits from a reduction in vehicle speed on and around their premises.

Available in MPH standard (KM/H optional). Fastest vehicle detection mode. Two window display (lock & target). RS232 port for printer and memory options. Hard carry case supplied. Battery pack available.

Code SCZ45

SPEEDLASER - R

- Features: rugged, lightweight, heads-up display, range of 2 miles, speeds from 0 to 200 mph, fast acquisition time (0.3 seconds), rechargeable batteries within its handle, tripod mounting fitting
- Home Office approval pending.

This comes complete in a yellow soft case with chargers for in car and mains units

SpeedLaser R: Laser Atlanta SpeedLaser R LIDAR system is built to be rugged, having a GE Lexan ABS alloy housing constructed with space between outer case and inner components for shock resistance. Rubber bumpers guard against damage if dropped. The head-up display LED shows the speed measurement and targeting sight that is user-selectable for cross hair, aiming dot or combined display. The rear LCD screen also displays the speed measurement, indicates the distance from the target and whether the vehicle was oncoming or receding. The LCD screen presents a plain-language system menu in one of four user-selectable languages. Able to display speeds in either miles or kilometers as set in the factory. Speciality detection modes include inclement weather, stealth, stop-watch and obstructed view. Power is supplied by battery handle with 240 volt mains and 12 volt car chargers. Durable softside carrying case and user manual included in packages.

NEED SOMETHING DIFFERENT?

SPEED TRAILER, ANCILLARY SIGNAGE AND ADDITIONAL SIGNS AVAILABLE - PLEASE CALL FOR FULL SPECIFICATION & PRICES.

SPEED MONITOR TROLLEY

- Warns drivers of their speed on and surrounding your site
- Proven* drivers reaction is to slow down
- Portable self contained unit - wheel it out - use it - wheel it back
- CE approved to the R&TTE Directive (1999/5/EC)
- For use in — Schools, Bus Depots, Haulage Depots, Hospitals, Entrances to Villages, Sports Events, Exhibition Centres, Public Events, etc.

The speed monitor trolley has been designed to slow down traffic wherever danger exists. Reminding drivers of their current speed and the prevailing limit is remarkably effective at reducing speeds and therefore accidents*. Transport organisations can reap significant benefits from a reduction in vehicle speed on and around their premises.

* Independent data from TRL (Traffic Research Laboratories)
Details: 30cm high LED display. Scratch resistant display window. Weatherproof, aluminium display housing. Approach-only™ K-band radar. Runs off 12V. car battery (not supplied). Width 56cm, Depth 46cm, Height 1.5m. Weight 27kg. Easily disassembled for transport

Code SCSMT

SPEED MONITOR III

- Portable speed display sign with self-contained radar, which measures speeds of vehicles moving toward the sign.
- Super-bright, red, light emitting diodes (LED) give many years of service and requires no maintenance.
- Enclosed in Lexan® cabinet and weighs only 6kg. Set it up and plug it in.
- No training is required to use the sign, it can be used by schools, community organisations, or anybody interested in reducing speeds.

The Speed Monitor™ III controls speeding in the most friendly way. Since speeds are reduced without issuing tickets, the Speed Monitor III can generate positive feelings in the general public. Drivers have confidence in the accuracy of the sign because it employs MPH's exclusive Approach-Only radar, which eliminates false speeds generated by opposite direction traffic.

Features and Specifications

Display Characteristics: Two, 12 inch (30 cm) high digits can be seen at over 200 meters. Housing: Constructed from impact-resistant Lexan. Scratch resistant Margard® display window. Weatherproof to NEMA 4 rating.

Includes 15 inch (38 cm) tall "YOUR SPEED" sign

Radar Specifications: K-band DS III™ Approach-Only™ traffic radar 25mW transmitter power, nominal 12 degree antenna beam width Type accepted under FCC Part 90

System Specifications: Input voltage of 12 volts +/- 20% (standard automotive voltage) Operating current less than 1 amp (low battery drain) Operating temperature range of +70 to 20°C

Width: 20 inches (51 cm) Height: 17 inches (43 cm) excluding handle Depth: 5 inches (13 cm).
