Capabilities Statement

Shatterball is as simple as throwing a dart.

Shatter Tactical proudly presents Shatterball, an innovative, reusable, reliable tool designed to enhance safety and efficiency of vehicle breaches. Whether deployed for assessing potential threats or executing high-risk breach maneuvers, Shatterball will easily shatter tempered auto glass allowing agents to maintain a tactical advantage while reducing exposure to threats. Shatterball is proudly manufactured in the USA, using high-quality U.S. steel, and designed to meet stringent requirements for local, state, and federal procurement.

Shatterball stands out in the tactical market by offering a straightforward, effective, and dependable solution for vehicle breaches. By eliminating the need for traditional, high-risk breach methods, Shatterball provides a safer and more cost-effective alternative. Its compact design and reusability make it an ideal choice for agencies that require efficient, reliable, and cost-conscious solutions.

Core Features and Benefits

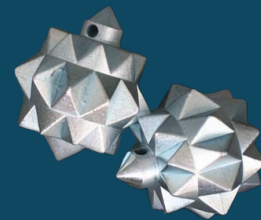

Shatterball is Simple and Intuitive

- **Tactical Safety & Effectiveness:** whether performing a tactical breach or an emergency rescue, Shatterball is deployed from a safe distance with no need for proximity or direct contact.
- **Compact & Lightweight Design:** Shatterball are **less than one ounce** and **smaller than one inch**, offering multiple carry options for seamless integration.
- **Durability & Reusability:** Shatterball are engineered for durability, reusability, and built to withstand harsh conditions to minimize long-term costs associated with other breach tools.
- **Quick & Simple Deployment:** Designed for rapid deployment providing safe and effective operation under pressure. Shatterball provides instant access to vehicles during critical situations.

If you can toss a dart, you can toss a Shatterball.
It's that simple.

Streamlined Implementation Approach

- Patented Technology By

Shatterball offers a highly reliable and cost-effective tool for vehicle breach operations which enhances safety and reduces risk. Its simple deployment, compact design, and proven performance make it the ideal choice for agencies looking to maintain a tactical advantage while safeguarding their teams. For agencies seeking to improve their vehicle breach capabilities while adhering to federal procurement requirements, Shatterball is the solution. Shatterball is fully TAA and Buy America compliant.

SHATTERBALL

Presented by Shatter Tactical

Mission Support Elements

Mitigates Risk to Agents	Reduced Exposure to Threats: By allowing glass penetration from a safe distance, Shatterball enhances safety during high-risk vehicle entry situations and allows evaluation of potential threats without need for direct contact.
Optimized for Portability and Mobility	Lightweight and Compact: Shatterball are roughly the size of a quarter, which ensures agents can easily conceal and carry our tool while allowing for rapid deployment. Shatterball provides a simple, immediate solution during critical incidents.
Extremely Simple and Intuitive	Ease of Use: Deploying Shatterball is as simple as throwing a dart and requires minimal training for implementation.

Testimonials

I put them to the test while pursuing a vehicle and—let me tell you—they work great. The perpetrators were caught and insisted for hours that we shot at their car because of the rear window exploding upon impact from the ball. -**NYPD**

I was most impressed with one of the angles it was deployed from ... I was purposely trying to get it to fail, however, it did not.

-**Musselshell County (MT) Sheriff's Office**

We were very impressed with how it almost 'evaporated' the side windows. It almost seemed unreal. This email is just to convey how impressed I was with your product and to thank you for supporting our profession.

-**Olympia (WA) Police Department**

Great product. It made a believer out of people watching them deployed. Kept officers in a better tactical and safe position over walking up and busting the window.

-**North Mankato (MN) Police Department**

Shatterball Shatters the Competition

Minimize Operational Costs	Shatterball's reusable design significantly reduces the need for costly and potentially hazardous traditional breach tools, making it a budget friendly option for agencies.
Reliability & Proven Success	Unlike other tactical breach tools, Shatterball provides covert carry with non-intimidating appearance, ensuring operations remain professional without appearing militarized.
Trusted Worldwide	Trusted by federal, state, local, and international law enforcement agencies, Shatterball has consistently delivered exceptional results, earning a reputation for its dependability and effectiveness in the field.
