

# Shatterball

---

Instant access to any vehicle

Shatterball is a window breach device for use on tempered auto glass.

Shatterball  
instantly defeats  
tempered auto  
glass on impact.

Stand back.  
Stay safe.  
Simple toss.

# How to Deploy

Shatterball is deployed by tossing the ball as if you are sticking a dart into a dartboard.

Shatterball does not need to be thrown aggressively. However, just like darts, if you toss it too lightly, it may bounce off.

Just stick the dart!

For use on:

Door Glass  
Rear Glass  
Sunroofs

# Laminated Glass

Laminated glass is most often used in front windshields. Shatterball will only crack/spiderweb laminated glass.

Laminated glass is also found in some front driver and passenger doors.

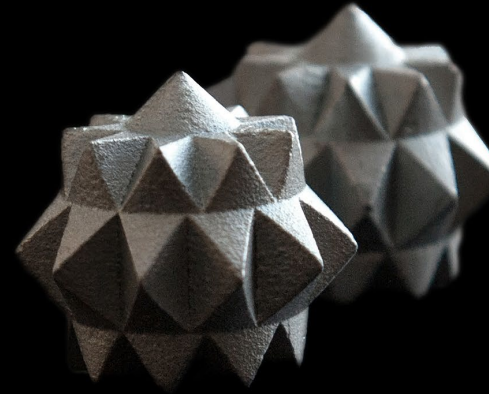

**Important Note:** If Shatterball does not defeat the front door glass, simply deploy Shatterball through the rear door glass or rear main glass for instant access to the vehicle.

# Helpful Tips

- Shatterball is steel - Sticks great to magnets!
- Some agencies hit them with a quick shot of hi-vis spray paint for ease in retrieval
- Shatterball was designed for auto glass, though several agencies have reported successfully deploying them through residential and commercial building glass
- Please be careful not to drop Shatterball through your glass desk or coffee table!
- Need a holder? Molle vest, duty belt, and dash mount holder options available at [Tactilogix.com](http://Tactilogix.com)

Thank you  
for choosing  
Shatterball.

We hope  
they serve  
you well.

**SHATTERBALL**

**Simple · Effective · Reusable**
