

SHATTERBALL

Tempered Auto Glass Breach Device

Shatterball is a one-inch spiked (non-sharp) metal ball developed to easily breach tempered auto glass. As simple as tossing a dart, Shatterball are designed to be deployed by hand from a safe distance.

Benefits:

- Easy, one-hand deployment
- Highly effective from any distance
- Can be used on moving vehicles and/or deployed from moving vehicles
- Simplifies and expedites window breaches in emergencies
- Reduces risk of window breach glass injuries
- Permanent, reusable, Made in the USA

Material: Steel | **Weight:** 1.16 oz. | **Size:** .988 inch

Important Note: Shatterball are not designed for, nor are they effective at, breaching laminated glass. Laminated glass is utilized in ALL front windshields and some driver side and passenger side front door glass. Laminated front door glass is found in approximately 3% of vehicles currently on the road. If you encounter a laminated window in the field, simply deploy Shatterball through the rear door glass.
